

C Programming Questions Compilation

UNIT 10: INPUT / OUTPUT

1. Explain printf function in C with an example program.
2. Explain format specifiers in printf function in C using a program.
3. Explain field width specifier in printf function in C.
4. Explain escape sequences in C.
5. Explain scanf function in C.
6. Differentiate between getchar() and getche().

UNIT 11: DECISION CONSTRUCTS

1. Describe control structures in C.
2. Explain if statement with example.
3. Explain if-else statement.
4. Explain nested if statement.
5. Explain if-else-if ladder.
6. Explain logical operators.
7. Explain switch statement.
8. Explain conditional operator.

Programs:

- Find largest of three numbers
- Check positive/negative/zero
- Check vowel or consonant
- Leap year program
- Grade calculation

UNIT 12: LOOP CONSTRUCTS

1. Explain while loop.
2. Explain do-while loop.
3. Difference between while and do-while.
4. Nested loops.
5. Average marks program

6. Goto statement

Programs:

- Prime number
- Even numbers
- Table printing
- Sum using loop

UNIT 13: FUNCTIONS IN C

1. Difference between structured and unstructured programming
2. Importance of functions
3. Types of functions
4. Function format
5. Local and global variables
6. Functions with/without arguments

Programs:

- Reverse number
- Factorial
- GCD
- Calculator using functions

UNIT 14: FILE HANDLING IN C

1. Streams in C
2. File opening modes
3. File pointer
4. Reading/writing files
5. String handling

Programs:

- Copy file
- Count characters
- Count words

- Contacts file handling

BISE PRACTICALS

1. Fahrenheit to Celsius
2. Celsius to Fahrenheit
3. Max and Min of numbers
4. Pattern printing
5. Product of odd numbers
6. Area calculations
